

Young Women in Trades and Technology...Bring it On!

There are multiple enjoyable and financially very rewarding career paths offered in the Technology and Trade sectors of the Construction and Manufacturing Industries.

Isabella
AUTOMOTIVE TECHNOLOGY

Cin
FURNITURE MAKING

Nina
ELECTRO TECHNOLOGY

For too long, far too long, women have been denied their right to a substantial place in Trade and Technology sectors by a broad range of complex factors. Currently women make up only 2% of the Construction Industry in Australia, the percentage has basically not changed since the 80s.

A number of enthusiastic young women from Years 10-12 studying Technology and Trades at Northern College of the Arts and Technology (NCAT) Murray Road Preston, have a goal of working in these industry sectors and want to change this situation. They are also very keen to encourage other young women into Technology and Trades by forming the NCAT Young Women in Trades & Technology Group.

The NCAT Women in Technology Group is inviting young women in Years 9, 10 and 11 who are interested in Technology, and their parents/guardians, to an important activity at NCAT on **Tuesday August 8 @ 6.00 pm.**

Carly
ENGINEERING

Giovanna
BUILDING & CONSTRUCTION

At the activity, "Bring It On!" you will be able to meet qualified tradeswomen from a range of different industries, female Tech students from NCAT, local employers, union and employer organisations. You will also be able to tour the NCAT Technology facilities.

Light snacks and drinks will be available and car parking is available inside the College off the Murray Road Entrance.

Places are limited for the activity, so please contact by Friday 14 July:
